# COMMUNITY OF PRACTICE AND LEARNING (CoP-L)

A network of actors who interact regularly and learn together through an exchange of experiences, skills, and approaches to improve their practices. This process of **social learning** allows for changes in understanding that go beyond the individual and is situated in a broad community that shares commonalities in their practices, finds meaning in their interactions and learning, and creates an identity that brings participants together.

We want to understand how this process is taking place within and between our mosaics and across all GIA participants
